 - Each shooter will be handicapped to 25 based on their average of the first four scores

 - Handicap will be adjusted every two weeks using the season to date average
 - Example: After week 4, SKEETER has shot 15+17+16+19+22+10+18+11 for a Total 128. His average of 16 (128 divided by 8) subtracted from 25 gives him a handicap of 9 per round starting week 5.
